

Week 4 Afternoon project: API

Part 1:

1. `http https://swapi.dev/api/people/4/`
2. `http https://swapi.dev/api/planets/2/`
3. `http https://swapi.dev/api/starships/10`
4. <https://swapi.dev/api/species/2>
`http https://swapi.dev/api/people/2/`
5. `https://swapi.dev/api/people/10/`
`https://swapi.dev/api/films/2/",`
`"https://swapi.dev/api/films/3/",`
`"https://swapi.dev/api/films/4/",`
`"https://swapi.dev/api/films/5/",`
`"https://swapi.dev/api/films/6/"`
6. `https://swapi.dev/api/starships/?search=Millennium Falcon`

Part 2:

1. You can only request the body which is the text part of the posts.
2. Returns an array.
3. <https://practiceapi.devmountain.com/api/posts/id/555>
`https://practiceapi.devmountain.com/api/posts/?id =555`
4. 409
- 5.

{

```
"id": 295,  
"text": "Dallin is my name.",  
"date": "01 Dec 2021"  
},
```

<https://practiceapi.devmountain.com/api/posts>

6. [https://practiceapi.devmountain.com/api/posts/?dallin blue/](https://practiceapi.devmountain.com/api/posts/?dallin%20blue/)
7. <https://practiceapi.devmountain.com/api/posts/?search=blue>
8. application/json; charset=utf-8
9. You would get a 409 if you try to update something that is not there.
10. Nothing happens
